## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP'818.

The applied EP'818 discloses that it is known in the art to produce, make and use optically coherent multilayered film coated powder. The prior art particles have a base and at least two coated layers having refractive indexes different from each other. See page 2, paragraph 0008-0013, page 3, paragraph 0017- page 4, paragraph 0029, examples and claims.

The applied prior art does not specifically disclose the claimed equations. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to optimize and conform the parameters and properties of the EP'818 powers to such equations, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art.

3. Claims 11-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 24, 2007.
